Uncaught referenceerror google is not defined javascript

LifeSavertomchentw/react-google-maps LifeSaver Skip to first unread messageunread, Feb 13, 2016, 5:07:41 PM2/13/16Sign in to reply to authorYou do not have permission to delete messages in this groupSign in to report message as abuseEither email addresses are anonymous for this group or you need the view member email addresses permission to view the original messageInteractive Media Ads SDKHi All, Running into a really frustrating problem here and i'm wondering if anyone else has ran into this. I load the following script:var adDisplayContainer = new google.ima.AdDisplayContainer(elem[0], videoContent);I end up getting this error:ReferenceError: google is not defined Which makes sense because my ima3.js isn't being loaded (maybe it's just not getting loaded fast enough). But i don't see it in my developer tools sources tab. This has happened to me before, then it started working again, and now I'm back to this not working.Has anyone dealt with this issue before? Is there any way to load the ima3.js locally? unread, Feb 13, 2016, 5:26:18 PM2/13/16Sign in to reply to authorYou do not have permission to delete messages in this groupSign in to report message as abuseEither email addresses are anonymous for this group or you need the view member email addresses permission to view the original messageInteractive Media Ads SDKOne other thing I wanted to mention. When I replace this: console.log("loading IMA googletag"); var script_tag = document.createElement('script'); script_tag.setAttribute('type', 'text/javascript'); script_tag.onerror = function() { alert("Loading failed!"); } document.getElementsByTagName('head')[0].appendChild(script_tag); see my onerror event firing:script_tag.onerror = function() { alert("Loading failed!"); }There is something definitely going on. Any ideas?unread, Feb 15, 2016, 5:37:45 PM2/15/16Sign in to reply to authorYou do not have permission to delete messages in this groupSign in to report message as abuseEither email addresses are anonymous for this group or you need the view member email addresses permission to view the original messageInteractive Media Ads SDKJust thought I'd follow up with this issue. I'm really hoping I'm not the only person in the world running into this. Would anyone happen to know if any reasons why a .js script would fail to load on a page in the first place?On Saturday, February 13, 2016 at 8:07:41 AM UTC-8, dubya wrote:unread, Feb 16, 2016, 2:10:52 AM2/16/16Sign in to reply to authorYou do not have permission to delete messages in this groupSign in to report message as abuseEither email addresses are anonymous for this group or you need the view member email addresses permission to view the original messageInteractive Media Ads SDKHi there,Are you launching your implementation by opening your file directly with a web browser? If so, it might not work as your browser might have security settings in place that might prevent the SDK from loading. Make sure you are hosting your files on a web server. There are many options, so do that and let us know if you continue seeing the issue.unread, Jun 23, 2016, 11:47:25 PM6/23/16Sign in to reply to authorYou do not have permission to delete messages in this groupSign in to report message as abuseEither email addresses are anonymous for this group or you need the view member email addresses permission to view the original messageInteractive Media Ads SDKHi there,This is happening to me too. Does ima require the website to run in https or something like that?unread, Jun 24, 2016, 3:19:40 PM6/24/16Sign in to reply to authorYou do not have permission to delete messages in this groupSign in to report message as abuseEither email addresses are anonymous for this group or you need the view member email addresses permission to view the original messageInteractive Media Ads SDKHi Lucas, IMA doesn't require the website (where the user is actually on to watch the ad and content) to be on HTTPS. In fact, you can navigate to our sample example on GitHub, and confirm that. However, the browser may (or may not) require resources (IMA-affiliated, and third-party) to be served via HTTPS. For this, IMA does not have control of, given each browser handles this HTTP/HTTPS mixed content issue differently. The best that can be done here is to make sure all resources are fully available online, served via HTTPS, and have proper CORS header, among other criteria. Those are some of the things I'd recommend checking with your implementation in order to rectify this issue. Feel free to send us some information (a page URL, code snippets, screenshots, etc.) if necessary.unread, Jun 9, 2017, 9:30:39 PM6/9/17Sign in to reply to authorSign in to report message as abuseEither email addresses are anonymous for this group or you need the view member email addresses permission to view the original messageInteractive Media Ads SDKI want to download ima3 locally...but throwing errorunread, Jun 12, 2017, 4:14:42 PM6/12/17Sign in to reply to authorYou do not have permission to delete messages in this groupSign in to report message as abuseEither email addresses are anonymous for this group or you need the view member email addresses permission to view the original messageInteractive Media Ads SDKOur team does not recommend downloading the SDK for use locally. Making the call to the ima3.js script ensures that you're always loading the latest version of the SDK. If you continue to have issues, or if you have any further questions, please open a new thread on the forum.unread, Jul 22, 2017, 12:59:43 AM7/22/17Sign in to reply to authorYou do not have permission to delete messages in this groupSign in to report message as abuseEither email addresses are anonymous for this group or you need the view member email addresses permission to view the original messageInteractive Media Ads SDKCheck for adBlock, that was for meunread, Mar 14, 2018, 11:17:59 PM3/14/18Sign in to reply to authorYou do not have permission to delete messages in this groupSign in to report message as abuseEither email addresses are anonymous for this group or you need the view member email addresses permission to view the original messageInteractive Media Ads SDKHi Chris, isn't it slower to run everything from the cloud though? We're really trying where I work to play the player within 2 seconds (supposedly the industry standard) so serving locally would work best? As an aside, I built a test page with video and the ima SDK and from online, it doesn't load fast enough I guess bc I need a timeout. Is there another way to do this? Also with this question, I used a time out because or some reason, an ad container was blocking the player but once I changed this to display none, it works fine. var target = document.getElementById('content-video-ima-ad-container'); target.style.display = 'none'; adTagUrl: ' + 'u=/124319096/external/ad_rule_samples&ciu_szs=300x250&ad_rule=1&' + 'impl=s&gdfp_req=1&env=vp&output=xml_vmap1&unviewed_position_start=1&' + 'cust_params=sample_ar%3Dpremidpostpod%26deployment%3Dgmf-js&cmsid=496&' + 'vid=short_onecue&correlator='unread, Mar 15, 2018, 4:43:31 PM3/15/18Sign in to reply to authorYou do not have permission to delete messages in this groupSign in to report message as abuseEither email addresses are anonymous for this group or you need the view member email addresses permission to view the original messageInteractive Media Ads SDKWe are unable to support locally hosted copies of the SDK and we do not recommend using one. We've found that dynamic serving provides for the best user experience as it guarantees that players are using the latest SDK version at all times. With regard to your timeout question, can you clarify what exactly you're asking? If you'd like to implement a timeout for loading the SDK binary, you'll have to do that on your own. It's not possible to do this via the IMA SDK because before the binary is loaded, you won't have access to any SDK functions. If you have any further questions, please open a new thread. Keeping new topics segregated makes it easier for our team to track responses and keep the forum organized.unread, Mar 15, 2018, 4:54:23 PM3/15/18Sign in to reply to authorYou do not have permission to delete messages in this groupSign in to report message as abuseEither email addresses are anonymous for this group or you need the view member email addresses permission to view the original messageInteractive Media Ads SDKYep, thanks Chris. My Timeout question is basically because the libs don't seem to load in a timely manner. By the time I want to work with the sdk, all the elements are still not rendered to the page yet so I have to run time out code in order to wait for all the elements to load or perhaps run a set interval looking for the ima sdk elements. I think it's faster if served locally but I haven't tested. I thought it was a good question to ask here. Just wanted your opinion on that.
